Revision Description

Conditions Governing Access

Collection is open for scholarly research.

RAC is unable to provide access to obsolete media. When feasible, a digital surrogate may be created via special order. All applicable charges will apply. See RAC Head of Archival Services or RAC Head of Digital Programs for details.

[^ Return to Table of Contents](#)

Controlled Access Headings

- Vivisection
- Genetics
- DNA
- Biology -- Research
- Medicine, Preventive
- Medical care
- China
- Cell and biomolecular sciences
- Medical research
- Medical sciences
- Seitz, Frederick
- Rockefeller Institute for Medical Research

- MacLeod, Colin M. (Colin Munro)
- Avery, Oswald Theodore
- McCarty, Maclyn
- Rockefeller University

Physical Characteristics and Technical Requirements note

Materials requiring specialized equipment for access (film, audio, video, slides) may be closed to research dependent on availability of the applicable equipment

Brittle or damaged items, or materials otherwise in need of preservation care, may be closed to researchers at the discretion of the RAC Head of Archival Services/Head of Reference.

| Biographical/Historical note | |
| <p>The Christmas Lectures were started at The Rockefeller University in 1959 under the guidance of Alfred E. Mirsky. For a complete history see the Alfred E. Mirsky papers. After Dr. Mirsky's death in June 1974 the lectures were renamed The Alfred E. Mirsky Christmas Lectures on Science.</p> <p>The taping of the Christmas Lectures began in 1968. Originally they were taped, numbered and stored consecutively with other taped University events. Since 1972 Christmas Lecture tapes are handled as an individual series. In the Archives, starting with the 1968 tapes, the series is kept as a discreet unit. A very few of the earliest lectures can be found with the papers of the scientist who delivered the lecture. Catalog card descriptions should bring together all those that are available in the archives.</p> | |

Emil C. Gotschlich: The Ecology and Molecular Biology of Bacterial Diseases, 1984 December 26-27

General note

This is the first year we have both reels and cassettes for the AEM Christmas Lectures on Science. There is a cassette for each lecture and 2 reels for the four lectures.

Wednesday, 1984 December 26

box 6

reel 1

Scope and Contents note

Cassette 1: Lecture 1. Bacterial Diseases - The Rules of the Game.

Cassette 2: Lecture 2. Gonococcus - The Professional.

Conditions Governing Access:

Conditions Governing Access

RAC is unable to provide access to obsolete media. When feasible, a digital surrogate may be created via special order. All applicable charges will apply. See RAC Head of Archival Services or RAC Head of Digital Programs for details.

Thursday, 1984 December 27

box 6

reel 2

Scope and Contents note

Cassette 3: Lecture 3. Cholera Bacillus - A Man for All Seasons.

Cassette 4: Lecture 4. Vaccines - Of Mice and Men.

Conditions Governing Access:

D. Martin Carter: Skin: Our Protective Envelope, 1985 December 26-27

Thursday, 1985 December 26

box 6

reel 1-2

Conditions Governing Access:

Conditions Governing Access

RAC is unable to provide access to obsolete media. When feasible, a digital surrogate may be created via special order. All applicable charges will apply. See RAC Head of Archival Services or RAC Head of Digital Programs for details.

Scope and Contents note

[PLEASE NOTE: Lectures 1 and 2 delivered in reverse order from original information as cited on covering letter and poster. Confirmed by D. Martin Carter/Joan Hofmann, 15 Apr 1986].

Cassette 1 (Side 1 & 2): Lecture 1: Barrier. How the filamentous keratin layer of the skin controls fluid loss and drug absorption.

Cassette 1 (Side 2) & Cassette 2 (Side 1): Lecture 2:
Color. How pigment cells migrate and synthesize and
transfer melanin.

Friday, 1985 December 27

box 6

reel 2-3

Scope and Contents note

Cassette 2 (Side 2) & Cassette 3 (Side 1): Lecture 3.
Healing. How the healing of wounds is enhanced by
"Artificial skin" and biosynthetic dressings.

Cassette 3 (Sides 1 & 2): Lecture 4. Repair. How cells
repair DNA damage caused by ultraviolet, x rays, and
chemicals.
