Biographical/Historical note

Herbert Spencer Gasser, 1888-1963, physiologist, was Director of The Rockefeller Institute for Medical Research, 1935-1953. His early work at the University of Wisconsin and at Washington University was done on circulation and respiration, including the mechanism through which the heart is accelerated in exercise and the rate of decreased oxidation in the respiratory center. Later at Washington University and at Cornell University Medical College his major interest was in the physiology of nerve, developing electrophysiological techniques through the development of vacuum tube amplification and the cathode ray oscillograph. In collaboration with Joseph Erlanger, also of Washington University, he developed an exhaustive determination of the constants of nerve fibers and the classification of nerve fibers in accordance with their properties. The two men shared the Nobel Prize in Medicine and Physiology in 1944 for this work.

Revision Description

Immediate Source of Acquisition note

The Herbert Spencer Gasser collection was deposited with the Rockefeller University Archives by The University.

Processing Information note

Processed by Ruth Sternfeld, 1977.

Conditions Governing Access note

This collection is open for research. Brittle or damaged items are available at the discretion of RAC. Material in the Rockefeller family collections that provides the names, correspondence, or activities

of living members of the Rockefeller family, and/or documents the net wealth of any Rockefeller family members, is restricted from scholarly access. Researchers interested in accessing digital media (floppy disks, CDs, DVDs, etc.) or audiovisual material (audio cassettes, VHS, etc.) in this collection must use an access surrogate. The original items may not be accessed because of preservation concerns. To request an access surrogate be made, or if you are unsure if there is an access surrogate, please contact an archivist.

Related Materials

Related Archival Materials note

Herbert Spencer Gasser was Director of The Rockefeller Institute for Medical Research 1935-1953. During his tenure he continued many of the administrative routines which had been established during the directorship of Simon Flexner. Thus, much administrative correspondence, in particular, matters dealing with personnel and administration of the physical plant are to be found in the papers of the Business Manager, Edric B. Smith, who served also, as Secretary of the Board of Trustees.

See FA137 Rockefeller University records, Business Manager, Subject Files, Series 3. See FA809 Rockefeller University records, Business Manager, Series 4.
