## Controlled Access Headings

- Ford Foundation

## Other Finding Aids note

General Correspondence Files for 1951-1970 are indexed by the Ford Foundation's Central Index cards, 1950-1975 (FA736). However, the index cards are no longer an accurate index of the General Correspondence files on microfilm, as these files were "weeded" prior to microfilming. It appears the index cards were not updated to reflect the destroyed correspondence.

The Central Index cards do provide indexing for correspondence after 1970, but these files are not housed in the General Correspondence Files. Correspondence indexed as "Gen 71..." or later might be found in the departmental Program/Division collections of correspondence, which are including in the individual 'Office Files' collections.

## Physical Characteristics and Technical Requirements

Materials requiring specialized equipment for access (film, audio, video, slides) may be restricted from scholarly research dependent on availability of the applicable equipment.

Brittle or damaged items, or materials otherwise in need of preservation care, may be restricted from scholarly research at the discretion of the RAC Head of Archival Services/RAC Head of Reference.
