## Biographical/Historical note

Theodore I. Malinin (1933- ) was a physician and professor of orthopedics and rehabilitation at the University of Miami's School of Medicine since 1969. He is best known in the medical community for his work on the science of preservation in regards to donated bone and tissues, and for his direction of the University of Miami Tissue Bank which he founded in 1970. Motivated by an article in Science magazine about the forgotten contributions of Dr. Alexis Carrel to the surgical field, Malinin set forth on a path of research that eventually culminated in 1979 with the publishing of Malinin's Surgery and Life: The Extraordinary Career of Alexis Carrel.

Alexis Carrel, born in France in 1873 joined the staff of the Rockefeller Institute for Medical Research (RIMR) in 1906 where he remained until his retirement in 1939. Winner of the Nobel Prize in Physiology and Medicine in 1912 for his work on vascular suturing, Carrel focused much of his research at RIMR on

the study of tissue culture and organ transplantation. After retirement Carrel returned to France where he died in 1944.

Malinin acquired most materials in this collection whilst compiling information for Surgery and Life. The materials were acquired from the Alexis Carrel Collection at Georgetown University, as well as friends and colleagues of Carrel, such as Charles A. Lindbergh (with whom Carrel developed the perfusion pump). The collection includes material on Carrel as well as his work with Lindbergh and other colleagues at RIMR, and Malinin's papers on Carrel.

## Slides-Carrel/Malinin, 1914-1977

Physical Description: 0.8 Cubic Feet

### Scope and Contents note

Contains both black and white and color projection slides. The Carrel slides are replicas of glass negatives related to Carrel's work during WWI in France and the development of the Carrel-Dakin Solution. They also contain slides related to vascular suturing as well as personal slides of Carrel, his wife and their home in France. The Malinin slides relate to presentation material regarding Carrel and his work with Charles Lindbergh on a perfusion pump.
