Biographical/Historical note

Lectures, Seminars, Research Colloquia and Thesis Presentations all form an integral part of the educational program at The Rockefeller University. Lectures which report on the work of the speaker's laboratory were one of the methods of interchange of information among the scientists, dating from the beginnings of The Rockefeller Institute for Medical Research. At that time they were called Friday afternoon lectures and were important presentations. Over the years different patterns of arrangement developed. Between 1953-1968, when Detlev Bronk was President, Alfred E. Mirsky was in charge of arranging the lectures, followed by Victor Wilson and Paul Cranefield. In the academic year 1974/1975 a committee was established with direct responsibility for programming and scheduling.

The 1974/1975 committee is composed of: Samuel C. Silverstein, Chairman, Einar Gall, Secretary, Elizabeth Dickson, Martha Fedorko, George Miller, Norton Zinder.

From their beginning, Christmas Lectures were handled by Alfred E. Mirsky under terms of a grant to him. (See Alfred E. Mirsky papers).

University Lectures and Research Colloquia are usually held on a Friday afternoon at 3:45 P.M.

Seminars are not normally arranged by the Committee on Lectures.

1973/1974, Dr. Paul Cranefield, then chairman of the Committee on Lectures instituted a plan to record, on tape, the University Lectures.
