Biographical/Historical note

In order to assist in the dissemination of scientific investigations conducted at the Institute and elsewhere, publication was an early and important activity of The Rockefeller Institute for Medical Research. A senior member of the scientific staff was usually the editor of a periodical. As early as 1910 the Institute had a Publication Service, which was supervised from 1910 by Editha C. Campbell until she retired in the fall of 1940. A Department of Illustration and Photography was under a part-time arrangement with Dr. Eduard Learning from 1906 until 1910 when Louis Schmidt undertook the direction of a full-time department. Louis Schmidt was at the head of the department until he reached the age of 70 in 1936. The work in the Department of Illustrations included hand-drawn illustrations for publications, photographs, moving pictures of experimental procedures made for the various investigators and used for a variety of purposes. Louis Schmidt served on a consultant basis until his death in 1939. Joseph Blauvelt Haulenbeek was acting in charge of Illustrations during that time and named officially in charge of illustrations in 1942, serving until he resigned September 1, 1946. Julian Alexander Carlile who was in charge of illustrations in the Department of Animal and Plant Pathology at Princeton took charge of the New York Department starting October 1, 1947 and divided his time between the two departments until they were consolidated during 1950. He directed the expanding department until his death in 1959 when he was succeeded by Richard F. Carter until 1964. In the academic year 1968/1969 Lewis William Koster became Manager of Graphic Services until 1973. March 1973 Bill Leyrer was appointed to that position.

Florence M. Stewart succeeded Editha Campbell in charge of the Publication Service in 1940 and served until she retired June 30, 1963, when she was succeeded by Margaret E. Broadbent.

Effective January 1, 1957 Charles Irvin Campbell was appointed Administrative Associate for Information Services. He had responsibility for a variety of information services among which were Secretary of the Library Committee, Librarian, ex officio, and supervision of the Publication Service and Illustration and Duplicating Services. Included were publication duties of such items as the Annual Report, Rockefeller Institute Quarterly, and the Calendar of Events. On October 20, 1958 the Board of Trustees approved a cooperative arrangement with the Oxford University Press to assist in producing, advertising and selling publications of the newly established Rockefeller Institute Press. The plan was for the Institute to continue publishing journals in accord with previously established policy and arrangements. Charles I. Campbell was appointed Director of The Rockefeller Institute Press. The Publications Service became the Journals Department without change of personnel or function. A new Books and Reports Department was created with responsibility for the production of books and the publication of bulletins and reports issued by the Institute.

January 1, 1960 Reynard F. Biemiller was appointed Assistant Director of The Rockefeller Institute Press. Effective December 5, 1960 Raymond B. Griffiths was appointed to the newly created position of Executive Editor of the Journal of Cell Biology.

Charles I. Campbell resigned May 15, 1962 and Joseph G. Sutton served as Acting Director of the Press from January 1963 until in 1964 William Arthur Bayless was named Director of the Press.

William Bayless retired as Director of The Rockefeller University Press on February 8, 1980. As of February 11, 1980, Mrs. Helene Jordan agreed to serve as acting director of the Press.

Effective July 1, 1980, Mrs. Helene Jordan was appointed Director of The Rockefeller University Press.

Title/Description	Instances
Journal of General Physiology, 1918-1955	
Scope and Contents note	
Correspondence and financial reports.	
Arrangement note	
Correspondence is arranged in chronological order.	
Financial reports, 1918-1947	box 1
Correspondence, 1918-1938 1939-1957	box 1
Scope and Contents note	
Including an outline of the editorial history of the Journal written March 7, 1955 by W.J.V. Osterhout. Correspondence is arranged in chronological order and deals primarily with number of pages per issue and covering letters sending manuscripts to the editors. Only in rare instances are editorial comments regarding scientific papers found. Most of the letters from W.J.V. Osterhout are handwritten.	
Material dealing with v. 8 which was called Jacques Loeb Memorial Volume	box 1
Forms and examples used for manuscripts	box 1

Advertisements in Science	box 2
Material dealing with campaign to increase number of subscribers and special rates covering back volumes in sets and costs of reprinting certain volumes	box 2
Journal of biological chemistry	
Correspondence, 1914-1925	box 3
Scope and Contents note	
Including agreement for publication by RIMR for the Society and final decision to dissolve agreement.	
Correspondents include: A.H. Richards; H.D. Dakin; E.K. Dunham.	
Arrangement note	
Arranged in chronological order.	
Report to the Directors and Financial Reports, 1915	box 3
Journal of clinical investigation	
Correspondence, 1921-1950	box 3
Scope and Contents note	
Including copy of Rufus Col suggestion to Board of Scientific Directors for a new journal dealing with clinical investigations.	
Correspondents include: G.C. Robinson; James Harold Austin; Alfred E. Cohn. Correspondence is primarily about publication through RIMR and the decreasing subsidy from, the Institute.	
Arrangement note	
Arranged in chronological order.	
Journal of experimental medicine	
Correspondence between Publications Division, Waverly Press and Charles Lindbergh concerning two publications, 1935-1943	box 3
JEM 62 (1935) pp. 409-431: "An apparatus for the culture of whole organs", 1935	box 3
JEM 70 (1939) pp. 231-238: "A culture flask for the circulation of a large quantity of fluid medium", 1939	box 3

Scope and Contents note

Includes reprint, page proofs, illustrations, 2 signed typescripts from Charles Lindbergh and holograph from Peyton Rous.

"Charles Lindbergh developed first workable artificial heart pump" written by Webb Garrison and including a picture of Lindbergh with Alexis Carrel

box 3

Scope and Contents note

Photocopy of news item added 1977 October 11 from National Enquirer Latana, Fla.
