## Biographical / Historical

---

In the early 1970s, the Ford Foundation's archives staff began to identify and catalog individual reports, policy and programming documents, and program evaluations in an effort to create an internal lending-library of useful documents. Many of the Catalogued Reports were physically culled from the former Foundation officers' and staff's archival collections of 'office files'. When those collections of 'office files' were later processed, and finding aids created, an appendix of "Reports Removed" (or, Reports Transferred") was added to the finding aids.

By 1977 the collection included more than 3,500 reports, and by 1979 some 5,000 reports had been cataloged.

Duplicated copies of the reports were also created on microfiche, and later microfilm.

[^ Return to Table of Contents](#)

---

## Scope and Contents

---

The Ford Foundation's Catalogued Reports collection includes policy and programming documents, program evaluations, and periodic program status reports produced by Foundation officers and staff, as well as consultants and grantees. Some published material produced by Ford Foundation grants is also included in the collection. The collection also includes some of the Ford Foundation's own publications, such as the Annual Reports and newsletters.

[^ Return to Table of Contents](#)

---

## Arrangement

---

The Catalogued Reports are arranged numerically by an arbitrary call number assigned during cataloging, from 1 to approximately 20,000.
