## Biographical / Historical

---

The Rockefeller Foundation was established by act of the New York State Legislature approved by the Governor on May 14, 1913, "to promote the well-being of mankind throughout the world." Between 1913 and 1928 the China Medical Board, the International Health Board, and the Division of Medical Education functioned as divisions of the Foundation, concentrating on the administration of programs in public health and medical education. A Division of Studies was created in 1923 to handle projects outside the medical field. These early years were experimental as the new foundation studied the methods of philanthropy and explored its relationships with other Rockefeller boards.

Although the Rockefeller Foundation is the largest and best known philanthropy founded by the Rockefeller family, it was neither the first nor the last to be established. The Rockefeller Institute for Medical Research (1901), the General Education Board (1902), the Rockefeller Sanitary Commission for the Eradication of Hookworm Disease (1909), and the Bureau of Social Hygiene (1911) all existed earlier. When the Foundation was created, the Sanitary Commission was disbanded. After the establishment of the Foundation, the Laura Spelman Rockefeller Memorial (1918) and the International Education Board (1923) were created.

The Rockefeller boards and their programs were reconsidered and reorganized in 1927-1928 in order to avoid overlapping programs. The International Health Board of the Foundation was disbanded and an International Health Division was organized. The China Medical Board, Inc., was established as a separately incorporated institution, and the China Medical Board of the Foundation ceased to exist. The Division of Studies was dropped and the Division of Medical Education was phased out. The Laura Spelman Rockefeller Memorial was combined with the Foundation and the Spelman Fund of New York was chartered to continue activities of the LSRM that were not absorbed by the Foundation. The International Education Board was disbanded.

As a result of this reorganization, the Foundation adopted a program which included public health work (administered by the IHD), the advancement of knowledge in the medical and natural sciences (in part taken over from the IEB), the social sciences (formerly the field of the LSRM), and the humanities and arts (shared with the GEB). The Rockefeller Institute and the Bureau of Social Hygiene were not affected by the reorganization. The program adopted by the Foundation at this time remained basically the same for the next twenty years.

As its files accumulated, the Foundation maintained a card index recording the names of institutional and individual grantees and correspondents. A microfilm copy of this index is available at the Archive Center.

---

## Arrangement

---

The Administration, Program & Policy material is physically divided into two groups; RG 3.1 and RG 3.2. The first group contains earlier material, up to about 1950, while the second group contains mostly later material, roughly 1950 to 1980, though there are some exceptions.

There are 28 separate entries, arbitrarily numbered, dividing the material into areas of administrative or program interest. Files within these series are arranged alphabetically.

Many files in RG 3.1 continue into RG 3.2.

## Natural Sciences and Agriculture, 1913-1958

### Scope and Contents note

Correspondence, memoranda and reports concerning the development and administration of programs in agriculture and in natural sciences. The agricultural interests were combined with the Natural Sciences Division in 1946. A new program called Natural Sciences and Agriculture was formed in 1951. The natural sciences aspect was terminated in 1955. It was resurrected in 1959 when two new programs were formed: Agricultural Sciences; and Medical and Natural Sciences.

## Medical and Natural Sciences, 1959-1968

### Scope and Contents note

Correspondence, memoranda and reports concerning program and policy developments in the medical and natural sciences. The topics covered include schistosomiasis and the role of nursing as a component in the Rockefeller Foundation's medical program. This series represents the re-emergence of the natural sciences as a Rockefeller Foundation program. This division succeeded the Medical Education and Public Health and the Biological and Medical Research Divisions in 1959 and was itself replaced by the Biomedical Sciences Division in 1970.
