## Biographical / Historical

---

Beginning in 1961/1962 under the direction of John P. Hervey and Robert L. Schoenfeld the University established a program for the application of electronics to biological research at the University. The plans called for amplification of bioelectric potentials; methods for automatic data calculation and display; electronic control of biological stimuli, chemical processes and instruments; application of engineering theory in biological measurements and models.

The work of the laboratory became, over the years, extremely wide in scope and variety.

In 1979 the laboratory began to issue a series of technical reports.

### Revision Description

Paper finding aid converted to EAD/XML by AureXus in 2010. Imported into the Archvists' Toolkit by Becky Robbins. 2010 November 12

### Immediate Source of Acquisition

Date received or inventoried: August, 1979.

### Conditions Governing Access note

This collection is open for scholarly research.

## Controlled Access Headings

---

- Life sciences
- Animals -- Diseases
- Pathology
- Medical technology
- Plant diseases
- Medicine, Preventive
- Medical education
- Medical sciences
- Biochemistry
- Medical research
- Technology
- Biology -- Research
- Diseases
- Cell and biomolecular sciences
- Rockefeller University
- Rockefeller Institute for Medical Research

---

## Other Finding Aids

---

FA833 Rockefeller University records, Laboratory of Electronics, Subject Files

## Physical Characteristics and Technical Requirements

---

Materials requiring specialized equipment for access (film, audio, video, slides) may be restricted from scholarly research dependent on availability of the applicable equipment.

Brittle or damaged items, or materials otherwise in need of preservation care, may be restricted from scholarly research at the discretion of the RAC Head of Archival Services/RAC Head of Reference.
