Biographical / Historical

In March 1960 an Office of the Registrar was established to maintain records of faculty and students. This was a function which to this date had been handled by the Dean of Students and through the Office of the President. Earlier records of the scientific staff had been kept in the Office of the Business Manager. The first appointment to the position of Registrar was Marian Lucius who resigned in June 1972.

The functions of the office developed as it became an adjunct to the Office of the President. Reports to the New York State Education Department were made from this office. Various statistical data on institutional facilities, such as the library; the number of degrees granted; subjects and rank of instructional staff were filed through this office to be reported to the State Department of Education.

When a program of state-aid to non-public institutions of higher education was established required reports were made each year.

After the resignation of Marian Lucius, Phyllis Viets was appointed and served to June 1974.

Antonia Siddiqi, from the Office of the President, took charge of the functions of the Office of Faculty and Student records in addition to her work on the Grant Proposals and Grant Programs of the various laboratories. In 1979 Antonia Siddiqi became Secretary to the Board of Trustees as well as Director of the Office of Sponsored Programs with Eleanor Gibson handling much of the routine of Faculty and Student records.

[^ Return to Table of Contents](#)

Scope and Contents

Contains early grants, grants made for construction in new laboratory space or new health research facilities, as well as institutional grants made for trainee or post-doctoral fellowships, and grants made to support research of a scientist(s).

[^ Return to Table of Contents](#)

Arrangement

Primarily arranged alphabetically by the name of the scientist receiving the grant, with early grants generally arranged in sequence.
