Biographical / Historical

Alexandre Rothen, physical chemist at The Rockefeller University (formerly The Rockefeller Institute for Medical Research) from 1927-1970. He built one of the first Polariscopes for the study of rotatory dispersion in the ultraviolet range and developed the air-driven centrifuge (originally designed by Pickels of the Rockefeller Foundation). From 1942 he was interested in monomolecular layers and published many papers on chemical interactions at a liquid-solid interface. He built the first ellipsometer with a half shadow device.

Administrative Information

Publication Statement

Rockefeller Archive Center

15 Dayton Avenue

Sleepy Hollow 10591

archive@rockarch.org

URL: <http://www.rockarch.org>

Conditions Governing Access

Open for research with select materials restricted as noted. Laboratory notebooks are restricted for 40 years from the date of reception. Laboratory notebooks are open for research in 2028. Brittle or damaged materials are open at the discretion of RAC.

Immediate Source of Acquisition

Boxes 1-7: received from T.P. King, December 1983.

Boxes 8-11: received from Mrs. Rothen, October 1988.

Processing Information

Minimal Processing has been conducted to establish basic intellectual and physical control of the material and assess immediate preservation and conservation needs. Material remains as received, in original folders and storage containers.
