## Biographical/Historical note

---

Louise Pearce, 1885-1959 physician and medical researcher was connected with The Rockefeller Institute for Medical Research from 1913 when she came as a fellow. She remained at the Institute and advanced to Associate Member from which position she retired in 1951. She was a key figure in developing the drug tryparsamide to control African sleeping sickness for which she received the King Leopold II prize of \$10,000 and was made an officer of the Royal Order of the Lion. She worked closely with Dr. Wade Brown and their accomplishments included the discovery of the Brown-Pearce carcinoma a rabbit cancer and also the virus cause of rabbit pox. In 1935 she moved her laboratory to the Department of Plant and Animal Pathology at Princeton where after Dr. Brown's death she finished up the work he had started on constitution.

Additional biographical material about Louise Pearce is located in a folder in the Archives office bio file.
