Biographical / Historical

The War Demonstration Hospital at the Rockefeller Institute for medical Research had its beginnings in a hospital that Alexis Carrel set up in Compiegne, France in August, 1914. In a hotel building donated by the French government and with a \$20,000 grant from the Rockefeller Foundation, Carrel set up a special hospital to combine research with treatment in order to find better methods of combating severe bacterial infections of lacerated wounds. Henry Drysdale Dakin, an English biochemist who had worked for a time with Christian Herter at the RIMR, joined Carrel. Dakin developed a solution of sodium hypochlorite

buffered with sodium bicarbonate that was used in the irrigation of wounds after radical surgery removed the injured tissue.

When the United States entered World War I, the Rockefeller Foundation again grained money to Carrel to set up a hospital where American and French military surgeons could be trained in the Carrel-Dakin treatment. In six weeks, the grounds of the Institute accommodated sixteen portable hospitals. Each of the hospitals had two wards of 25 beds each and an operating pavilion. The designs for these temporary hospitals were tested for their applicability to the conditions at the front.

Twice each month, beginning August 2, 1917 and lasting until March 29, 1919, doctors were assigned to the War Demonstration Hospital by the Surgeon General to take a two-week course in the Carrel-Dakin method. Edric Smith, the Assistant Business Manager, ran the War Demonstration Hospital for Henry James, the Business Manager, who had enlisted in the Army. Major George A. Stewart was assigned to the War Demonstration Hospital by the Surgeon General in September 1917. Stewart had received his medical degree from the Johns Hopkins Medical School and Hospital and had worked at the St. Agnes Hospital in Baltimore. At the War Demonstration Hospital, he organized the clinical service and laboratory courses. On February 14, 1918, Stewart was placed in charge in Carrel's absence and named Surgeon-in-Chief.

Mary L. Whitney was appointed Superintendent of the War Demonstration Hospital, with Eleanor G. Evans as Assistant Superintendent. They supervised the daily operation of the hospital and were in charge of the training of the nurses.

In March, 1919, the RIMR began shutting down the War Demonstration Hospital, which formally closed in April. When used, the Carrel-Dakin treatment was effective; however, the procedure was too involved for military surgeons and required too much equipment and training for civilian surgeons. The treatment ended up being used only for trivial wounds until penicillin was discovered, when it was discarded altogether.

Scope and Contents

This material is arranged in nine series:

1. Class Records, 1917-1919. 0.6 cubic feet Arranged chronologically.

Includes photographs and evaluations of students; also includes correspondence, students' background notes, and tests.

2. Correspondence, 1917-1919, 1959. 2 folders Arranged chronologically.

Materials in this section include correspondence and memos. Subjects include the construction of the War Demonstration Hospital and the disposition of case histories.

3. Hospital Records, 1917-1919, n.d. 3.0 cubic feet Arranged alphabetically by subject.

Materials in this section include daily reports, index cards, inventories, and statistics. Subjects include names of men assigned to the War Demonstration Hospital for training, with grades, patient and payroll statistics, and supplies.

4. Instructional Material, 1917-1918, n.d. 3 folders Arranged alphabetically.

Includes a course list and reports. Subjects include Carrel's method on treatment of infected wounds and Dakin's solution.

5. Photographs, 1916-1919, n.d. 6 folders Arranged alphabetically.

Includes photocopies of photographs. Subjects include chemistry class, nurses, a Theodore Roosevelt letter of congratulations to Carrel, and surgical class.

6. Printed Materials. 1917, n.d. 4 folders Arranged alphabetically.

Includes announcements, articles, catalogues, and newspaper clippings.

7. Reports, 1916-1919. 3 folders Arranged alphabetically.

Includes reports by Carrel and Flexner. Subjects include the hospital at Compiègne and the War Demonstration Hospital.

8. Major George A. Stewart, 1917-1919, n.d. 0.6 cubic feet Arranged in three sub-sections.

a. Correspondence, 1917-1919. 0.4 cubic feet Arranged alphabetically and then chronologically within each letter.

Includes correspondence, memos, and telegrams. Subjects include answers to inquiries about medical cases and the use of the Carrel-Dakin treatment. Correspondents include Simon Flexner, John G. Long, Joseph P. Meehan, and the Navy.

b. Reports, 1919, n.d. 2 folders Arranged alphabetically.

Includes reports on hospital and other topics.

c. Subject Files, 1917-1919. 0.2 cubic feet Arranged alphabetically and then chronologically within each letter.

Includes correspondence, memos, notes, and reports. Subjects include the Carrel method, the Dakin solution, empyema, radium, students' reports on use of Carrel-Dakin treatment at camps, tethelin, and X-rays.

9. Superintendents' Files, 1917-1919. 0.2 cubic feet Arranged in two sub-sections.

a. Correspondence, 1917-1919. 0.2 cubic feet Arranged alphabetically, then chronologically within each letter.

Includes correspondence, memos, and telegrams. Subjects include nursing staff positions, special materials needed for the hospital, and visits to see the War Demonstration Hospital in operation. Correspondents include Eleanor G. Evans (Assistant Superintendent), Henry James, M. Kenzel, and Mary L. Whitney (Superintendent).

b. Miscellaneous, 1917-1919. 1 folder Arranged chronologically.

Includes correspondence, notes, and telegrams.
