Summary Information

Repository:	Rockefeller Archive Center
Creator:	Rockefeller University
Creator:	Rockefeller Institute for Medical Research
Title:	Rockefeller University records, Laboratory of Electronics, Subject Files
ID:	FA833
Date [inclusive]:	1949-1985
Physical Description:	0.44 Cubic Feet 1 box.
Physical Description:	1 box.
Language of the Material:	English

Preferred Citation

Biographical / Historical

After Detlev Bronk became President of the Rockefeller Institute in 1953, he decided to strengthen the already existing Electronics Laboratory by hiring John P. Hervey, a professional electrical engineer. Hervey, in turn, hired Dr. C. Yang to be his assistant. When Yang left for China in 1956, Robert L. Schoenfeld replaced him. While Hervey was in charge of long-term projects at the Institute's Jacques Loeb Laboratory in Woods Hole, Massachusetts, Schoenfeld ran the laboratory in New York, working on development and research.

[^ Return to Table of Contents](#)

Scope and Contents

Includes primarily publications (reprints and technical reports); also includes correspondence and personnel material.

Subjects include policy matters and the National Academy of Engineering.

Correspondents include Detlev W. Bronk.

[^ Return to Table of Contents](#)

Arrangement

Alphabetical.

Controlled Access Headings

- Plant diseases
- Diseases
- Animals -- Diseases
- Biology -- Research
- Medical technology
- Life sciences
- Medical education
- Medical sciences
- Cell and biomolecular sciences
- Technology
- Medical research
- Pathology
- Medicine, Preventive
- Biochemistry

Other Finding Aids

FA227 Rockefeller University records, Laboratory of Electronics, Technical Report
