Biographical / Historical

Biography: Hideyo Noguchi (1876-1928) Japanese born bacteriologist who came to The Rockefeller Institute for Medical Research in 1904 and was successively Assistant, Associate Member and Member until his death in 1928. He worked closely with Simon Flexner. His first work was on the study of snake venoms. He then worked on collateral problems in immunology, syphilis and other forms of spirochetes and the etiological factors in Yellow Fever, Oroya Fever and trachoma. He served as bacteriologist of the Yellow Fever Commission sent by the International Health Board of The Rockefeller Foundation. He died at Accra, West Africa while on a project for the study of Yellow Fever.

Member of: American Association of Pathologists and Bacteriologists; Society for Experimental Biology and Medicine; Harvey Society; Society for Experimental Therapy and Pharmacology; Society for Clinical Serology and Haematology (President, Councilor); Gesellschaft für innere Medizin und Kinderheilkunde of Vienna; St Louis Medical Society of Syracuse (Honorary Member); Academy of Medicine of Suffolk Medical Society; Colorado State Medical Society; American Philosophical Society; Association of American Physicians; American Association for the Advancement of Science ; Sociedade de Antonio Alzate, Mexico City; Mexican National Academy; Société de Biologie, Paris (Corresponding member); Société de Pathologie Exotique, Paris; Norske medisinake Selskab (Christiana); Société de
