Biographical / Historical

Lowell Stewart Hardin earned a bachelor's degree in agricultural economics from Purdue University in 1939 and his doctorate from Cornell University in 1943. He was a member of the Purdue agricultural economics department faculty from 1943 to 1965 and served as department head from 1953 to 1965.

In 1965, Hardin left Purdue to join the Ford Foundation as a program officer within the Latin American Office setting up agricultural training programs. Hardin and his colleagues at the Ford and Rockefeller Foundations worked to create international agriculture research stations, first in the Philippines, then in Mexico. Ultimately, there were seventeen centers around the world in a global network covering the major food commodities. International staffs under international boards of directors were supported to do research and training, primarily in sustainable methods for plant and animal production to increase the available food supply.

In 1970, Hardin became a program officer with the Office of the Vice President within the Ford Foundation's International Division, Middle East and Africa program. During his 17 years with the

Foundation, he was a principal architect of the worldwide system of international agricultural research centers.

Hardin returned to Purdue in 1981, and he became the Assistant Director of International Programs in Agriculture, a position he held until 2007. Hardin died in 2015 at the age of 97.

[^ Return to Table of Contents](#)

Scope and Contents

Lowell Hardin worked for the Ford Foundation from 1965-1981 in the field of international agriculture research and training. This collection of Hardin's office files contains reports related to agricultural training and production, budget and program planning documents from agricultural research and training centers, planning documents and reports from the Arid Lands Agricultural Development (ALAD) Program in Beirut, and meeting materials from the Consultative Group on International Agricultural Research (CGIAR).

International Agriculture Research and Training, 1968-1982

Consultative Group on International Agricultural Research (CGIAR) and International Agricultural Research Centers, 1968-1980

Scope and Contents

CGIAR Technical Advisory Committee (TAC) meeting materials, international agricultural centers' budget and program materials, and reports

Biographical / Historical

The Consultative Group for International Agricultural Research (CGIAR) was established on May 19, 1971, to coordinate international agricultural research efforts and achieve food security in developing countries. CGIAR arose in response to the widespread concern in the mid-20th century that rapid increases in human populations would soon lead to widespread famine. Originally, CGIAR supported four international research centers: the International Rice Research Institute (IRRI) (est. 1960), the International Maize and Wheat Improvement Center (CIMMYT) (est. 1963), the International Center for Tropical Agriculture (CIAT)(est. 1962), and the International Institute of Tropical Agriculture (IITA) (est. 1967).

Arid Lands Agricultural Development Program (ALAD), 1971-1975

Biographical / Historical

Arid Land Agricultural Development (ALAD) was a program of the Ford Foundation that operated in Lebanon in the 1960s and 1970s. The program's goals were to make the best use of limited water resources, to improve production of staple food crops in a region of major food gaps, and to address the complex integration of crop and livestock production in the dry areas. ALAD later became the International Center for Agricultural Research in the Dry Areas (ICARDA), established in 1975.
