## Biographical/Historical note

Philip Duryee McMaster, 1891-1973, scientist worked in pathology and microbiology at The Rockefeller University (earlier RIMR) from 1919 until his death in 1973.

[Note: re Dr. McMaster's middle name: In the N.A.S. Biographical Memoir by Walther F. Goebel, "Duryée" is accented as indicated. Following an inquiry by Carol Moberg in connection with the printing of the Philip D. McMaster Lecture program, a check was made of documents in Dr. McMaster's file, (Boxes 1 and 2). No evidence of Dr. McMaster's use of the accented form was found. Mrs. McMaster also told Carol Moberg that Dr. McMaster did not put an accent on his middle name. C. Kopp, 16 April 1985]
