Biographical/Historical note

Dilworth Wayne Woolley, 1914-1966 made fundamental discoveries in vitamin research. He was responsible for the first chemical isolation and proof of nicotinamide; contributed to the characterization and establishment as vitamins, pantothenic acid and inositol. He made the first demonstration of an anti-vitamin (pyrithiamine) effective in higher animals, and elucidated principles of antimetabolites; made the first antimetabolite of serotonin and discovered its involvement in mental processes; research on receptor or serotonin.

Biographical note	
1914	Born July 20 Raymond, Alberta (of U.S. parents)
1933-1935	Assistant, University of Alberta.
