## Biographical/Historical note

Oswald H. Robertson (1886-1966), a physician, researcher, and educator, was affiliated with the Rockefeller Institute for Medical Research for five years, starting in 1915. He worked at RIMR with Peyton Rous on an investigation of the normal life span of red blood cells. Robertson also investigated other questions in hematology such as the effects of repeated transfusions on bone marrow activity.

Starting in 1919, Robertson held a position at the Peking Union Medical College. He was associate professor of medicine until 1923 and then become professor of medicine and head of the department until 1926.

### Revision Description

Paper finding aid converted to EAD/XML by AureXus in 2010. Imported into the Archivists' Toolkit by Becky Robbins. 2010 September 29

## Processing Information

Basic Level 1 Processing has been conducted to establish initial intellectual and physical control of the material and assess immediate preservation and conservation needs.

## Conditions Governing Access note

Limited access. Consult archivist for assistance.

## Controlled Access Headings

---

- Blood
- Hematology
- Medicine, Preventive
- Life sciences
- Medical sciences
- Biochemistry
- Cell and biomolecular sciences
- Medical research
- Biology -- Research
- Medical education
- Physiology
- Rockefeller University
- Rockefeller Institute for Medical Research
- Robertson, O. H. (Oswald Hope)

---

## Physical Characteristics and Technical Requirements

---

Materials requiring specialized equipment for access (film, audio, video, slides) may be closed to research dependent on availability of the applicable equipment

Brittle or damaged items, or materials otherwise in need of preservation care, may be closed to researchers at the discretion of the RAC Head of Archival Services/Head of Reference.
