Processing note: The material has been refolded into acid-free folders; overstuffed folders have been divided into two or more folders. The notes on single sheets have been kept in their original order, with paper clips removed. Care should be taken that the order of the notes is not disturbed, until the pages are numbered or annotated.

Most of the folders are labeled: an original label along the top margin, and additional identification and code number added by Dr. Hotchkiss ca 1986 on the front cover of the folder. These labels have been trimmed from the original folders and are preserved in envelopes in front of the laboratory notes. Only brief titles are given in the inventory here.
